Abstract (en)

[origin: EP2295333A2] The frame (1) has a circular profiled base (2) mounted in an edge area of an opening of a container i.e. can, which stores dyes and varnishes, where the frame is made of plastic by injection molding and the container is made of polyethylene and polypropylene. A bracket (3) is fastened to the base by film hinges (4a, 4b), where the bracket and the base are made of plastic material. The base has a hole (5), where the hinges are attached at the hole for connecting the bracket to a side wall of the container. The film hinges run along and/or transverse to the hole. An independent claim is also included for a container having a frame.
