Abstract (en)

A waste disposal apparatus 11 includes an open/close sealing mechanism 28 that nips a film 15 at a position between a film accommodating portion 14 and a waste accommodating main body 13 to seal a space below the nipped part of the film 15 from a space above the nipped part of the film 15. The sealing mechanism 28 has a sealing door 33 capable of being opened and closed, and a sealing door receiving portion 35. Film nipping portions of the sealing door 33 and the sealing door receiving portion 35 include concavo-convex shapes that bend a vertical intermediate portion of a film portion to be nipped, laterally with respect to an imaginary straight line that connects upper and lower ends of the film portion to be nipped.
