Abstract (en)

A film accommodating cassette 54 is detachably attached to a film attachment portion 12 formed in an upper region of a waste disposal apparatus 41 for accommodating a waste material, and includes only: a cylindrical tubular core 57 that forms a waste inlet 16 at its upper end; a lower flange 57f that extends radially outward from a lower end of the tubular core 57; and an upper flange 59 that extends radially outward from the upper end of the tubular core 57. The lower flange 57f has a cassette-side latching portion that engages with the film attachment portion 12 to couple the film accommodating cassette 54 with the film attachment portion 12.
