Abstract (en)

[origin: EP2295669A2] The window has a covering sheet (1) fastened to a wing frame and designed as a profile sheet (2), and an assembly part (10) made of plastic. The covering sheet and the assembly part are held at each other by locking connections (11, 12). The locking connections comprise openings (13, 16) that penetrate into the covering sheet. The locking connections comprise hold-down devices (15, 18) that overlap the covering sheet. The hold-down devices hold projections (14, 17) of the assembly part in the openings, where the locking connections are arranged at distance to each other.
