Abstract (en)  
[origin: EP2295786A1] The connection part has an end side (12) formed with an inflow opening (14), and another end side (13) formed with an outflow opening (16), where the latter end side is connected to the inflow opening through a passage bore (15). A main body (11) is extended to the latter end side from the former end side in the direction of a longitudinal axis (A). The former end side is formed with a conical surface, and the latter end side is formed with a circular surface. A connecting bore (23) is opened in a seating surface (24). An independent claim is also included for a large diesel engine comprising a pressure pipe.
