Abstract (en)  
The pump (1) has a pump body (2) with a screw-like rotor (5) rotatable relative to the pump body. The rotor is coupled with a driving motor by a connecting unit, where the rotor is rotatable by the driving motor. The connecting unit is designed as a connecting shaft (15) rotatably supported in the pump body. The connecting shaft is sealed to the pump body by a sealing element (17), and the rotor is detachably arranged at the connecting shaft. The connecting shaft is designed as a hollow shaft (19) into which a connecting bolt (20) is inserted, where the bolt is screwed into the rotor.

Abstract (de)  
Exzentrerschneckenpumpe, umfassend einen Pumpenkörper mit einem relativ zum Pumpenkörper drehbaren schneckenartigen Rotor, der über ein Verbindungsmittel mit einem Antriebsmotor, über den der Rotor drehbar ist, koppelbar ist, wobei das Verbindungsmittel eine im Pumpenkörper (2) drehgelagerte und zum Pumpenkörper (2) über wenigstens ein Dichtelement (17) abgedichtete Anschlusswelle (15) ist, an der der Rotor (5) lösbar angeordnet ist.
