Abstract (en)

The module (10) has an optical deviation element i.e. elliptical reflector (12), for admitting a focus (F1), and a support (20) for supporting the element and including a support face (61) located at a distance from the focus. An adapter (70) is supported against the support face, and a printed circuit board (80) is fixed to the adapter. An LED is fixed on the board that electrically powers the LED. The LED includes a photoemissive element (14) for emitting luminous rays towards the reflector. The adapter is positioned such that the photoemissive element is positioned near or on the focus. An independent claim is also included for a method for replacing an LED fixed on a printed circuit board by another LED fixed on another printed circuit board, in an optical module.

Abstract (fr)

Module optique (10) pour dispositif d'éclairage et/ou de signalisation pour véhicule automobile comprenant : - un premier élément de déviation optique (12) qui admet un foyer (F1), - un support (20) de cet élément de déviation optique (12) avec une surface d'appui (61) située à une distance (d) du foyer (F1), - un adaptateur (70) en appui contre ladite surface d'appui, - un circuit imprimé (80) fixé sur l'adaptateur, - au moins une DEL fixée sur ledit circuit imprimé, l'adaptateur étant configuré de manière à ce que l'élément photoémissif de la DEL soit positionné sensiblement sur le foyer F1.
