Abstract (en)

[origin: WO2009141395A1] The invention relates to a method for removing deposits on a work surface of a press tool (2,3,21,22), in particular for producing a work piece in the form of a wood material plate, a coated wood material plate (9,23,26) and/or a laminate. In order to reliably and cost-effectively remove deposits in the form of residue on a press tool, it is provided that the work surface is irradiated by a laser beam (18) produced by a laser system (16,17,27) and that deposits adhering to the work surface are removed by the laser beam (18).
