Abstract (en)

[origin: WO2010003458A1] In order to be able to flexibly use a container (3) comprising a pressure medium in a pressure device (1), which queries a state of the container (3), a state indicator signal (ZAN) anticipated by the pressure device (1) is stored on a preliminary basis in a storage (9) and output to the latter following a query signal (ZAB) by the pressure device (1).
