Abstract (en)  
[origin: WO2010003164A1] The invention relates to a vehicle crane, comprising at least two crane booms (3, 4), which are connected to each other by way of a joint such that the angles thereof are adjustable and comprising at least one hose extending between the crane booms (3, 4), said hose being exposed in the region of the joint in at least one angular position of the crane booms (3, 4), wherein at least one flexible plate (6) is provided, which is connected to the at least one hose or covers the same at least in the exposed region and which can be bent by a change of the angular position of the at least two crane booms (3, 4).
