Abstract (en)

[origin: WO2009092357A2] The present invention relates to a multiple shell semi-finished component for building structures. At least two shell elements (2 and 3) are made of curable casting material reinforced with reinforcing fibers (5). The shell elements (2, 3) are fixed at a parallel distance from each other by means of compression, tension, and shear bearing spacers (4) anchored in the casting material of the shell elements (2, 3), so that a sturdy wall (1) is formed.
