Abstract (en)  
[origin: WO2009150237A1] The present invention relates to a non-lethal munition (1) comprising a case (2) and a projectile, the case (2) comprising a high-pressure chamber (6) in which there is a pyrotechnic propellant assembly (7), the projectile comprising a base (3) and an ogive (4), the base (3) being in the form of a hollow cylinder open at its lower end and closed at its upper end by an upper wall (32), the ogive (4) being in the form of a hemisphere or of a cylinder surmounted by a hemisphere, the ogive (4) being made of a deformable material. The invention is characterized in that the ogive (4) is hollow and the projectile further comprises a mounting ring (5) which assembles the ogive (4) to the base (3).
