Abstract (en)
[origin: WO2009152630A1] The invention relates to a multi-way sliding plug (11), comprising a housing (13) and at least two plug contacts (40,50) of differing standards, which can be slid into the housing (13) into a passive position and out of the housing into an active position. Said plug contacts (40,50) each have a slide (47,57) with an operating head (15) and electrically conducting pins (41,43,45;51,53,55). The individual plug contacts (40,50) have three electrically conducting pins (41,43,45;51,53,55) on a common slider. At least two of said slides (47,57) are in a C-shape and arranged in opposition with the ends of the C-shape between the ends of the C-shape of the other slider (47,57).
