Abstract (en)
[origin: WO2010000334A1] The invention relates to a radio communication system (100) comprising a central station (130), at least one slave radio station (a, b, c, d, e, f), a first gateway (g1) and a second gateway (g2). The slave radio station (a, b, c, d, e, f) is coupled to the central station (130) by means of a first transfer path using the first gateway (g1) and by means of a second transfer path using the second gateway (g2). The invention further relates to a method for transferring data between a slave radio station (a, b, c, d, e, f) and a central station (130, 230, 330, 430) of a radio communication system (100) of the type described above.
