Abstract (en)
[origin: WO2010000639A1] The invention relates to an accelerator for accelerating charged particles, comprising a plurality of delay lines (13, 15) that are directed at a beam trajectory (35) and that are disposed in succession in the direction of the beam trajectory (35), wherein at least some of the delay lines (13, 15) are rotated with respect to one another relative to the beam trajectory (35).
