Abstract (en)

The present invention concerns a mirror with a lighting system comprising at least one reflective portion (5), characterised in that the mirror comprises a plurality of light emitting points (10, 210), and at least one light emitting point comprises at least one optical filter (45, 245, 246). Preferably at least one light emitting point (10, 210), more preferably all of them, comprises at least two optical filters (245, 246), preferably of different types.
