Abstract (en)
[origin: EP2298505A2] The invention relates to a hand tool (1) comprising a shaft (2) and a tool part (6) lockable in a detachable manner thereto by means of a connection mechanism (4) which comprises a spigot (8) and a socket (10) that are detachably interconnectable, which spigot (8) comprises a flexible element (12) that protrudes outwardly from the spigot surface (8) and which socket (10) comprises a gap (14) to receive the flexible element (12) when the spigot (8) is set inside the socket (8) for interlocking the shaft (2) and the tool part (6). According to the invention, the connection mechanism (4) comprises a sliding piece (16) mounted on top of the socket (10) and movable in the axial direction of the socket (10) for pressing the flexible element (12) out of the gap (14).
