Abstract (en)

[origin: EP2298668A1] The structure has a quadrilateral central part (1) forming bottom of a pack, and two strips (2) extending two opposite longitudinal edges (10) of the central part to form longitudinal walls of the pack, where a waterproof sheet in the structure is made of greaseproof paper/polyethylene terephthalate. Two tabs (3) extend other opposite transversal edges (11) of the central part. Two tab legs form transversal walls of the pack, where each tab leg is separated from the adjacent strip by a hollow zone (4) provided with an edge (40) that is located away from the edges of the central part. An independent claim is also included for a method for forming a pack.
