Abstract (en)
[origin: EP2299027A1] The structure has a balustrade (6) including a U-shaped profile element (20) welded or screwed on lower brackets of the balustrade, where the element is directed inward at a raised position of the balustrade. The balustrade is arranged at different levels of a floor (5) that is used to connect posts (3) and crosspieces. The element occupies height of the floor to be protected such that the balustrade is not installed if the floor is already in place.
