Abstract (en)
[origin: EP2299033A1] The liquid container has a ring-shaped side wall (2) made of flexible material. A stiffening unit (4) extending along a vertical axis of the liquid container is arranged at the side wall. A recess provided for the stiffening unit is attached to the side wall. The recess and/or the stiffening unit are arranged on a side of the side wall. The side wall has an opening (121) through which the stiffening unit is plugged. The recess extends along the vertical axis of the liquid container. Straps (102) are arranged at an outer side of the side wall. An independent claim is also included for a method for setting-up of a liquid container.
