Abstract (en)
[origin: EP2299048A2] The bearing has a bearing section (2) provided with two flange bearings (2a, 2b) for bearing a drive (5) and/or a rolling shaft. The flange bearings are arranged relative to each other, so that a plane formed by rotation axis of a rolling shaft runs to a plane of a closed rolling gate at an angle of 45 degrees. A guide (3) is provided in a rolling gate sheet, and a fastening section (4) is provided at a console (1) and fastens the console to a wall section. One of the flange bearings comprises a circular opening for enforcement of the rolling shaft.
