Abstract (en)
[origin: EP2299216A2] The tray has a corpus (1) comprising two side walls and a flap (2) that is tilted around a rotational axis, where the flap forms an upper part of a front side (5) of the tray and a front part (6) of an upper side (7) of the tray. The flap comprises a rear part, where a free end of the rear part is introduced to the front part under formation of a gap. The rotational axis lies above or on a curve that is described by quantity of points, where the points of the curve exhibit same distance of the free end of the rear part and a back part of the front side.
