Abstract (en)

[origin: EP2299546A1] The arrangement has a power generator (101), a power transmission device (102), a unit for power deflection, a contact point (110), a cold area and a hot area. The contact point is arranged in the hot area. The power transmission device has a tube or bar formed of ceramic. The unit for power deflection has a ceramic plate or a ceramic block with the contact point and a bore (105). An independent claim is also included for a method for electrical contacting.
