Abstract (en)
[origin: WO2009153782A1] Novel substituted cyclohexylidene-ethylidene-octahydro-indene compounds and compositions comprising the same are described. The compounds exhibit profound anti-proliferative effects, in comparison to other compounds known for their anti-cancer and anti-hyperproliferative ability. Methods of use of such compounds and compositions are described for treating a variety of cancers, inflammatory and other hyperproliferative diseases and disorders.
