Abstract (en)

[origin: WO2010006803A1] A wall cupboard holder for wall cupboards comprises a hook (11) with a hooking point (15) situated at the free end of an arm (12) which extends externally from a box-shaped body (14) made of plastic material containing a regulation mechanism for regulating the positions in depth and height of said hook (11). Fixing means of said box-shaped body are also envisaged, to the shoulder (20) of a cupboard (24). There are at least three fixing means, a first and second fixing device which are engaged with two respective interspaced points lying on a first plane (P1), and a third fixing device which is engaged with a third point lying on a second plane (P3), the arm (12) terminating with the hook (11) being positioned between said first and second plane (P1, P3).
