Abstract (en)
[origin: WO2009135240A2] The invention relates to a paper dispenser comprising a transport roller (1) which can be alternately rotated by a motor-driven or by a hand-driven mechanism, a first coupling member being associated with the transport roller (1) and respective second coupling members being associated with the two drives. The two second coupling members are interconnected by a mobile connecting element (6) and can be alternately engaged with the first coupling member.
