Abstract (en)  
[origin: WO2010003576A1] The invention relates to a sprinkler (2) and a switching device for a sprinkler (2), comprising a nozzle (22) supported rotationally about a rotary axis (A), having a switching unit (10) that can be switched between a first switch position and a second switch position, wherein a rotary direction of the nozzle (22) is determined by the switch setting, and the switching unit (10) comprises at least a one at least partially magnetic and/or magnetizable component (11, 12), so that the switching unit (10) is held in the first and/or second switch position by magnetic forces.
