Abstract (en)

[origin: WO2009133118A1] A roller to contact an oscillating ink transfer drum in an inking system for a printing machine is disclosed. It comprises a cylindrical body having a longitudinal axis and a curved outer surface. A recess is formed in the curved outer surface at an end of the cylindrical body that extends axially inward from said end of the cylindrical body by a depth that gradually reduces in a circumferential direction extending around said axis.
