Abstract (en)
[origin: WO2009008846A1] This invention is a movable glass system with self curtain placed in the open areas with more than one open face, such as balconies, shops and shop windows, said glass system being capable of sliding on profile rails (6,10) located on the bottom floor or the top ceiling and of rotating and folding owing to a wheel mechanism (7,13), said glass system having a curtain mechanism inside the upper leaf profile (5), wherein the curtain mechanism is able to move together with the glass and to be opened and closed together with the curtain, when desired, and wherein there is no need to install a separate curtain in the section covered with glass.
