Abstract (en)  
[origin: WO2010057507A1] The invention relates to a vacuum control device having at least one base unit (13) for issuing a vacuum to a vacuum consumer, wherein the base unit (13) comprises a supply and working interface (20) for supply and working connection means and supply and working connection means (15, 16, 28a, 28b) for mounting thereon, an exhaust air interface (30) for an exhaust air removal unit (29, 31) and at least one exhaust air removal unit (29, 31) for mounting thereon, a blow-out control interface (40) for a blow-out control device (32, 33) and at least one blow-out control device (32, 33) for mounting thereon, and a communication interface (50) for communicating with an external electronic control device, the supply and working connection means comprising collective connection means (16) for mounting a plurality of base units (13) combined as an assembly and individual connection means (15) for mounting an individual base unit (13).
