Abstract (en)  
[origin: WO2010006670A1] The invention relates to a transformer having a coil comprising a plurality of layers of wound conductive material (12, 21) and layers (16, 22) in between made of wound insulation material, wherein the layers (16, 22) of insulation material are wound in stages. The layers (16, 22) of insulation material are applied at an angle (a) to the winding axis (M-M).
