Abstract (en)  
[origin: WO2010006758A1] The invention relates to an electrical connection device for connecting a conductor to at least one contact sleeve consisting of a conductive material, said device comprising a clearing for a contact spring and a contact spring arranged thereon, said contact spring blocking a conductor inserted into the contact sleeve on a plug-in side thereof, against the inner wall of the contact sleeve. The contact spring can be outwardly pivoted by the clearing.
