Abstract (en)
[origin: EP2301374A1] The present invention discloses a kid identification wristband, which comprises a clip (1) and a band (2), wherein the clip (1) consists of a lid part (4) connected to a bottom part (3) through a connecting part (5). In the center of the bottom part (3) a positioning column (10) is provided, with two squeezing parts set symmetrically at the two sides of the bottom part (3). Retaining pawls (12) are provided on the lid part (4), and two inserting parts (6) with grooves (9) are disposed symmetrically at the two sides of the lid part (4) corresponding to the protruding parts (8) provided on said squeezing parts. An opening (13) is provided at the connecting part (5), and another narrow opening (14) is provided on the bottom part (3) some distance away from the connecting part (5). The band (2) is fastened to the clip (1) in such a way that one end of the band is fixed by the positioning column (10) and the other free end of band (2) passes through the narrow opening (14) of the bottom part and then the opening (13) of the connecting part (5) and is fastened between the bottom part (3) and the lid part (4). The advantages of the present invention are that the identification band can be fastened firmly and can be opened easily with merely two fingers as well as being easy and safe to operate.
