Abstract (en)
The device has dosing tubes (302, 306) for guiding respective fluids, where the dosing tubes exhibit a passage that is designed to feed the fluids to a solution of a decoating basin in a dosed manner. The dosing tubes are arranged close to a base of the decoating basin, where the dosing tubes are designed in meander-shape and exhibit respective connections (307, 308). An inflow (305) for the fluids is arranged at one end of the dosing tubes, and an outflow (303) for the fluids is arranged at another end of the dosing tubes.
