Abstract (en)
[origin: EP2302655A2] The electrical switch (1) has a housing (2) having a contact system (3) located in the interior. A moveable operating unit (4) is arranged on housing for switching action on contact system. An opening is provided in housing for switching action and an elastic seal (6) attached to the housing, seals the opening. The operating unit has a moving inner portion (7) located in the interior of housing, and a moving outer portion located on the exterior of housing. The outer portion moves the inner portion, through the seal, for switching action on the contact system.
