Abstract (en)
[origin: WO2010006346A2] Furniture drive for moving a furniture part (5) which is mounted in a vertically adjustable manner, having a drive apparatus (6), which has an electric motor (7), for moving the movable furniture part (5), and having a compensation device (11) which exerts a force which is opposite to the weight force on the movable furniture part (5), wherein a measuring device (17) is provided for detecting the weight of the movable furniture part (5), and therefore the force exerted by the compensation device (11) on the movable furniture part (5) can be variably adjusted as a function of the measured weight of the movable furniture part (5) by an adjusting device (16) which has a further electric motor (16a) and can be actuated by the measuring device (17).
