Abstract (en)
[origin: WO2009150065A1] A strip-like profile (1,1', 1", 1' ", 1" ") for a pull-out guide is formed from a bent metal strip, wherein bent portions (2, 4, 5, 6, 8, 9, 10, 14, 15) are provided in a central region of the metal strip in order to form at least one running path (25) for rolling bodies which are arranged between edge portions (6, 10) of the metal strip. According to the invention, at least one edge portion (6, 10) of the metal strip is fixed to an adjacent portion (2) of the metal strip. As a result, the rigidity of the profile can be improved in an effective manner. The invention also relates to a pull-out guide with a profile of this type and to a method for producing said profile.
