Abstract (en)

[origin: WO2010001076A1] The invention relates to a vehicle windshield wiper motor (10) including an output shaft (12) and provided with an attachment device for attaching a mounting structure onto a tube (20), said attachment device including an attachment base (14) and a plate, characterized in that the base (14) is provided with at least five attachment members (14-1 to 14-5) for attaching parallel rods therebetween, three attachment members (14-1 to 14-3) forming a first group being spaced around the output shaft (12) of the motor, and two attachment members (14-4, 14-5) forming a second group being placed at a sufficient distance from at least one of the three attachment members of the first group to form a cavity capable of holding said tube (20), said cavity being closable by the plate. The invention also relates to a mounting structure for a windshield wiper motor according to the invention.
