Abstract (en)

[origin: WO2009103318A1] The invention relates to an apron guide device (14) for a drawing system top roller (6). The apron guide device is used to guide an apron (13), which wraps around the drawing system top roller with the elastic coating (12) thereof. The apron guide device comprises a holder for the drawing system top roller and guide surfaces for the apron. The apron guide device has a base body (20) and a guide component (21) fastened to the base body. The base body comprises the holder for the axis of the drawing system top roller, and the guide component comprises at least one guide surface (17, 22) for the apron. Two guide components that can be fastened to the base body and are intended for adjoining drawing system top rollers of twin upper rollers may be provided, which can be fastened to the base body at different distances to each other.
