Abstract (en)

[origin: WO2010007231A1] The invention relates to an anti-theft system for protecting an item, including: - a protection element (1), associated with the item to be protected, which can move between a position in which the item is locked and a position in which the item is released; means (11) for magnetically locking the protection element (1) in the protection position thereof, which means can be deactivated using a magnetic lock opener; an alarm; alarm activation and deactivation means (20, 28); and a magnetic-field-sensitive element (30) configured to trigger the alarm when said sensitive element (30) is subjected to a magnetic field.
