Abstract (en)

[origin: CA2730892A1] A method for varying the aerodynamic shape of a blade (22, 24) of a gas turbine provides for this blade (22, 24) to be provided with a coating (42) composed of a shape-memory alloy. Hot air (36) is transported via channels (32) to the coated blade (22, 24), in order to cause a phase change in the coating (42), and an aerodynamic shape change to the blade (22, 24).
