Abstract (en)

[origin: WO2010007019A2] During the operation of an internal combustion engine (100) which has at least one sensor (101) for measuring a hydrocarbon content and a mass flow rate of a gas flow through a line (109), the hydrocarbon content and the mass flow rate of the gas flow are determined. The gas flow through the line is controlled as a function of the determined values.
