Abstract (en)

[origin: WO2010001017A2] The invention relates to a wrapper (3) for refrigerating material (2) and to refrigeration energy storage devices (1) using such a wrapper, particularly suitable for transporting parcels (5), the temperature of which it is desired to keep constant, or for being applied to the body of a human or animal and provide a dry cooling sensation. The outer surface of the wrapper is formed by a layer that absorbs moisture, particularly condensation. This layer is typically a non-woven fabric. See Figure 1.
