Abstract (en)

[origin: WO2009153442A1] The subject of the invention is a device (9) for protecting the floor (8) of the cabin (2) of a vehicle. This device comprises at least one armoured plate (10) which is located some distance from the floor (8) of the cabin and which is connected to this cabin by deformable means of connection. This device is characterized in that at least one of the deformable means of connection consists of a partitioned box structure (11) which is fixed to the cabin at a lateral substantially vertical wall (2a, 2b) thereof.
