Abstract (en)

[origin: WO2010139781A1] The invention relates to a bimetallic part (10) for use as an active switch element in a temperature-dependent switch, which bimetallic part comprises at least one inner area (13) and an outer area (12) surrounding the at least one inner area (13), wherein the inner and outer areas (13, 12) are integrally designed in some sections and mechanically separated from each other in other sections and are stamped in opposite directions, and wherein at least one contact area (21) is provided on the inner area (13) (Fig.1).
