Abstract (en)
[origin: EP2305061A1] The hair straightening device (1) has a comb-shaped straightening tool (3) with a molded part (7) and another molded part for forming a hair forming gap between the both molded parts of a hair receptacle. The hair forming gap placed between the molded parts is undercut in the hair shaping place of the molded parts in direction towards limiting of the hair receptacle connecting a teeth (5) of the hair straightening device.
