Abstract (en)
[origin: EP2305085A1] Shower cabin comprising a front wall (1) with a fixed part (11) having a top edge, and a door (12) displaced with respect to the fixed part so as to be movable in parallel fashion to itself and to the fixed part (11), between an opening position, in which it overlaps at least partially the fixed part (11), freeing a passage for permitting a user to enter the shower area, and a closed position in which said passage is blocked, the cabin also comprising guide means for the sliding of the door (12) comprising lower guide means (4,6) arranged at the base of the door and top guide means (5,8) operating in the top area of the door, the top guide means (5,8) comprising sliding means (5) projecting from a face of said door (12) and slidably engaged in a slot (8) formed on the fixed part (11) parallel to the top edge.
