Abstract (en)

The present invention relates to hard surface cleaning, and has as an object to provide a next time cleaning benefit. The invention provides the use of specific carboxylic or amino compounds for facilitating the removal of soil, in particular fatty soil, from a hard surface. The present invention further relates to a method for removing soil or stains from a hard surface. The method comprises the sequential steps of: treating the surface with a composition comprising at least one carboxylic or amino compound according to the current invention at a concentration of between 0.05 % and 10 % by weight; allowing the soil or stain to deposit and toughen; and cleaning the surface to remove the soil or stains.
