Abstract (en)
[origin: EP2305868A1] The needle (1) has a needle body (2) including a hook (3) on an end of the needle body. A slider channel (7) is provided in the needle body and delimited by a bottom and by two lateral walls (5, 6), where an opening extends through the bottom. A slider (8) includes two legs (9, 10), where the slider is arranged in the slider channel to be shiftable in a longitudinal direction. A partition element is located in the slider channel, where the partition channel includes a foot extension that extends through the opening. The foot extension is arranged to extend under the bottom.
