Abstract (en)

[origin: EP2305889A2] The wire basket has a set of side walls (2, 3) and a base (6), which are formed from a wire mesh. The side walls are opposite to each other. The base lies between the side walls. The wire mesh attaches another set of side walls (4, 5) with connections (31, 32). The connections are formed by ends of a set of mesh wires (9, 16) of the wire mesh. The connections are welded at the latter set of side walls in an area of cross points of another set of mesh wires (10, 11). Spacers (1) are hanged in the mesh wires.
